LinkedIn API Verification Guide

Date: February 8, 2026 **Platform:** LinkedIn Developer Platform **Portal:** https://developer.linkedin.com/

📋 Overview

This guide describes the complete process to obtain API access for LinkedIn's developer platform, including company page verification and API products request.

🎯 What You Need

Prerequisites:

- ✅ LinkedIn Company Page (must already exist and be active)
- ✅ Super Admin rights on the Company Page
- ✅ Business email matching company domain
- ✅ Clear use case for API usage

📝 Step 1: Create App

Process

1. **Go to LinkedIn Developer Portal**
   - URL: https://developer.linkedin.com/
   - Log in with your LinkedIn account (with Admin rights)
2. **Create New App**
   - Click “Create app” or “My Apps” → “Create app”
3. **Fill App Details**

   Required fields:
   - **App name:** Name of your application
   - **LinkedIn Page:** Select your Company Page (must be Admin)
   - **App logo:** Upload logo (300x300px minimum)
   - **Privacy policy URL:** Link to public privacy policy
   - **App description:** Describe what your app does
   - **App website:** URL of your application/website
4. **Accept LinkedIn API Terms**
   - Read and accept the API Terms of Service
5. **Create App**
   - Click “Create app”
   - You’ll receive Client ID and Client Secret (store securely!)

🏢 Step 2: Company Page Verification

IMPORTANT: Company Page verification is **MANDATORY** before you can request API products.

Process

1. **Go to App Settings**
   - Select your app in “My Apps”
   - Click “Settings” tab
2. **Start Verification**
   - Under “App settings” find “Company Page verification”
   - Click “Verify”
3. **Generate Verification Link**
   - LinkedIn generates unique verification link
   - Link is automatically sent to Company Page Admin
4. **Company Page Admin Confirms**
   - Company Page Admin receives email or LinkedIn notification
   - Admin must log in and confirm verification
   - Verification happens via LinkedIn interface
5. **Wait for Confirmation**
   - **Timeline:** 1-3 days
   - Status visible in App Settings

- ✅ “Verified” badge appears next to Company Page

📦 Step 3: Select API Products

After Company Page verification, you can request API products.

Available Products

1️⃣ Advertising API (Mandatory for other APIs)

What you can do: - Manage ad campaigns - Fetch analytics - Configure targeting - Manage budgets and bidding

Access Tiers: - **Development:** Limited calls, test accounts only - **Standard:** Full functionality, production use

2️⃣ Community Management API

What you can do: - Post on behalf of Company Page - Manage and reply to comments - Fetch engagement statistics - Content scheduling

Access Tiers: - **Development:** Test with own account - **Standard:** Production use

3️⃣ Lead Sync API

What you can do: - Integrate lead gen forms - Automatically fetch leads - CRM integrations

4️⃣ Conversions API

What you can do: - Track conversions - Measure attribution - Analyze ROI

✅ Step 4: Request Product

Process

1. **Go to Products Tab**
   - In your app dashboard: “Products” tab
   - Click “+ Add product”
2. **Select Product**
   - Choose desired product (start with Advertising API)
   - Click “Request access”
3. **Fill Use Case**

   Describe EXACTLY what you’ll do:

   - What functionality are you building?

- What data do you need?
- Why this specific API?
- How does this help your users?

4. **Submit Application**
   - Review your answers
   - Click "Submit for review"
5. **Wait for Approval**
   - **Timeline:** 7-14 days

🔑 Step 5: Configure OAuth Scopes

Important scopes: - `r_emailaddress` - User email - `r_liteprofile` - Basic profile info - `w_member_social` - Post on behalf of user - `w_organization_social` - Post on behalf of organization - `r_organization_social` - Read organization content

---

⏱️ Timeline

Phase	Duration
App Creation	5-10 min
Company Verification	1-3 days
Product Request (Development)	7-14 days
Testing in Development	1-4 weeks
Standard Tier Request	7-14 days
Total	**3-8 weeks**

📊 Rate Limits (Standard Tier)

Product	Limit per App	Limit per User
Community Management	500 calls/day	100 calls/day
Advertising API	1000 calls/day	200 calls/day
